New Connection Wizard

Network Connection
How do you want to connect to the network at your workplace?

Create the following connection:

- Dial-up connection**
Connect using a modem and a regular phone line or an Integrated Services Digital Network (ISDN) phone line.
- Virtual Private Network connection**
Connect to the network using a virtual private network (VPN) connection over the Internet.

New Connection Wizard

Public Network
Windows can make sure the public network is connected first.

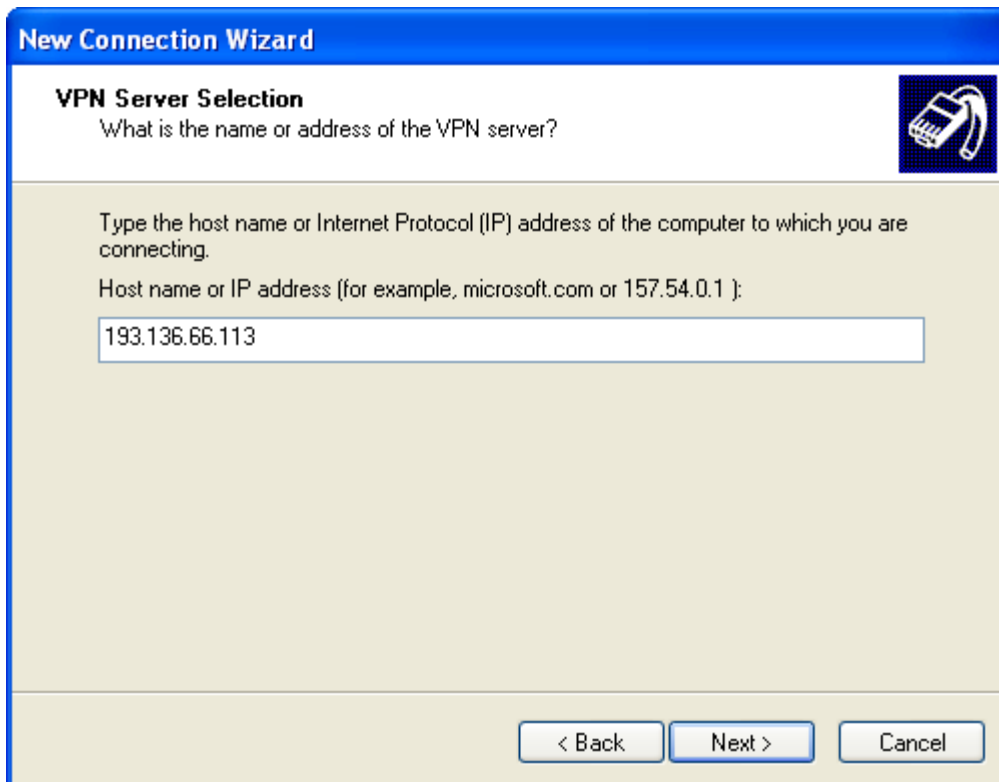

Windows can automatically dial the initial connection to the Internet or other public network, before establishing the virtual connection.

Do not dial the initial connection.

Automatically dial this initial connection:

User name:

Password:

Save this user name and password for the following users:

- Me only
- Anyone who uses this computer

Network Protocol Connection Result [?] [X]

 One or more requested network protocols did not connect successfully.

TCP/IP CP connected successfully.

IPX/SPX or compatible CP reported error 733: A connection to the remote computer could not be completed. You might need to adjust the protocols on this computer. For further assistance, click More Info or search Help and Support Center for this error number.

Press Accept to use the connection as is, or Hang Up to disconnect.

Do not request the failed protocols next time
